TEMBLORS LAID TO SINKING OF OCEAN'S FLOOR

Prof.Goode Explains Latest Disaster.

BY PHILIP KINSLEY.

One must go to the bottom of the sea to get at the cause of the California and Montana earthquakes, Prof. J. Paul Goode of the department of geogeismologist of authority, explained dead and injured in the earthquake:

Three or four miles out from the coast of Santa Barbara the maps show the ocean is very blue and about three of the C., B. & Q. railroad. miles deep. Down there, Prof. Goode thinks, is the start of that movement of the earth crust and sub-crust which came to the surface in a sudden slip or shock-and a mountain slid out of its place in Jackson's hole, and Santa Barbara, dozing in its yellow splendor by the Pacific, was shaken out of its

Ocean Bed Is Sinking.

"The bed of the Pacific ocean is sinking," Prof. Goode said, as he left his class in the summer school to study the maps in the latest zone of earth trouble. "The ocean water rushes in on top and makes the density at that point greater.

"Put your foot in the mud and press down. Observe that the mud becomes higher close to the foot. Something must come up when the sea bed sinks. That is the earth's crust on the western flank of North America and South America.

"The mountains, the cordillera forming the axis of the continent, are too nigh. They are settling about as a annon ball settles in a bed of tar.

FACTS ABOUT TEA SERIES-No. 2

Tea Production Today

If the Chinese, who first discovered tea, had realized the possibilities of the trade and had studied the nature and requirements of the plant, China might still be the largest tea producing country. Centuries of neglect, however, stunted the growth and caused the quality to deteriorate. In the mountains of Ceylon and India, tea was found to flourish. Scientific methods of cultivation and manufacture were introduced with remarkable results. Now the finest tea grown in the world and by far the largest quantity comes from these countries. "SALADA" is mainly blended from flavory India and Ceylon

Common Sense

above all things, scores uncommon results in advertising

WHEREVER you see dramatic success in advertising, you will find that common sense is its basic formula.

Study winning advertising and, above all things, that factor will impress you.

Circus ideas are of an unenlightened age. Vanities and furbelows have no place in salesmanship to the millions.

Yet comparatively few men recognize that simple precept.

Take an issue of any national magazine. See how the simply phrased, simply designed ads stand out above their fellows.

They mark the contrast between dignity and acrobatics. Between a well-dressed, coldly logical master salesman and a rival with pink spats. They carry conviction in exactly the same measure.

So when men ask the outstanding secret of compelling advertising, the wise advertising agent quotes the genius of simple, common sense.

He knows that method achieves unique results. For he has proved it countless times.

Successful agency organizations are built of men whose religion is that formula.

They judge advertising for what it is. They do not tamper with its force; do not handicap it with the bizarre.

They recognize that to be successful, advertising must be sincere; must convey the force of conviction.

Put that kind behind any business that could succeed without advertising, and sales will multiply.

Put any kind of advertising behind a business that could not succeed without it and little will result.

We hold that no business which could succeed without us could gain the heights because of us.

That seems simple, common sense to us. And upon common sense, above all things, profitable advertising rests.

know that the people of the state are solidly back of them in their course. No member of the general assumbly who would vote for an apportionment that would give Chicago absolute control of the legislature would dare face his constituents for reflection.

When the constitution of 1870 was adopted, it could not be anticipated that some day Chicago might grow in population until it absorbed within its bounds more than half of the inhabitants of the state. Had anyone been that far sighted, there would have then been drafted into that pact a provision limiting the representation of Cook county.

WHAT TO EAT.

WHAT TO EAT.

The war taught us many things about what to eat and what not to, according to Rockwood.

The Danes kept very healthy on a very restricted diet. Their death rate was exceptionally low in spite of many privations. They lived on a diet that consisted very largely of vegetables and whole grain breada. Their bread contained even more than the amount of liber contained in whole grains. They lived on a diet that consisted very little milk and meat.

Ormsby has shown that when we feed grain and other food to cattle and sheep and then kill them for meat, we recover only 3.5 per cent of the food values we fed tham. In other words, had we eaten the cattle and sheep food curselves, instead of feeding it, we would have gotten nearly 30 times the food value that we get out of eating the beef and mutten they supplied.

When we feed hogs, we recover 24 per cent of the values as pork. Of the food was feed cover we convict of the values as pork. Of the food was feed cover we convict its not recover of the pellagra in Italy and Germany. It seems probable that what we began to learn about yeast in the war time may solve the pellagra problem. For the benefit of those who have not seen this river at the point in question, I will say that the railroad bridge is very long, due to the great width of the river, but that the water does not seem to be over two or three feet deep.

Chicago, June 21.—It is commonly agreed by both Chicago and downstate people that Chicago is the center of weath in Illinois, which shows Chicago people are paying a greater tax per capits than the downstate people. In view of this fact, there are a great many people in Chicago who think they are en-titled to greater representation accordingly, and at the same time these same people are shouting for their demecratic principles. Most of them do not stop to realize that a poor tax, payer's vote is as good as the vote which is cast by a man who pays a large sum of money for taxes, which proves that taxation alone cannot be used as a fair means of determining representation. The only way in which the people ally represented, is by having an equa number of voters in each congression

What Better Recommendation Than This?

R. H. L. in his daily "Line O' Type Or Two" in the Chicago Tribune, June 3rd. said:

"One of the biggest four bits' worth of value w ever got for our money was a visit to the Convict Ship at the State Street Dock. It's like turning back the clock, and after you see the way men and women were herded on the ship, taken for a voyage of thousands of miles, the paths they made in the hard teak deck, the whipping post, the airless dungeons, the branding iron and the leaden tipped cat o' nine tails as punishment for people who had stolen perhaps a piece of pie, one gets the idea humanity is getting on.'

When the Convict Ship Was Launched in Far Away India in 1790-

George Washington was serving his first term as President of the United States. -The Battle of Waterloo was still 25 years in

To view her massive yellow hull, stamped with the sinister black, broad arrows of the British penal system; her tall and mighty spars, which formerly flew her arrow-marked sails in many latitudes; her graceful figurehead, reminiscent of the days when fine deep sea ships were loved as women; and her stately quarter decks and broad stern, is to whiff the great salt water ocean and realize something of ships and men of other days.

For she has sailed the seven seas, plowing her way through waters and winds in many climes, with cargoes ranging from precious jewels of the Orient to wretched and suffering human beings herded below her decks like cattle. Nabobs of India and Siam have sipped tea on her quarter deck.' Dusky princesses of the East have been entertained in her cabins. Hundreds of pitiful prisoners have died in her dungeon cells.

Pirates have chased her and more than one desperate battle has been fought across her solid decks. Her massive hull and her mainmast still bear the marks of pirate shots fired at her by black flagged ships in the Indian Ocean.

Today she is the last vivid reminder of the master sea fictionists of another day, authors like Clark Russell and John Boyle O'Reilly, whose pen pictures antedated the red-blooded, blue-sea stories of London, Melville and Conrad. She forms your only chance to see a ship like those of which you have read.

She is a floating monument of the most pathetic human drama ever played; a startling reminder that 100 years ago, and even less, women and little children, as well as men, were punished with life-long suffering and ignominy for trifling offenses. Abroad her may be seen the ringbolts and chains to which were fastened beautiful girls, often convicted wrongly, but nevertheless compelled to helplessly endure the terrors of a voyage of six months or more, completely under the domination of brutal warders.

While young women became gaunt and wrinkled, boys and girls of eight and nine years of age, transported for stealing apples or a two-penny pie, became hard-ened criminals from the sights they saw and the punishments they endured. For age and sex did not spare the victims of the convict ships from the heavy irons, the cat o' nine tails, the whipping posts, the branding and the tiny airtight dungeon cells below the water line to which they were thrust for the slightest infraction of the rules.

There is shown the figure of Elizabeth Stott and her child, transported for life, after death sentence had been commuted by the king, to the penal settlement of far off Australia, for the alleged forging of the equivalent of fifteen dollars. What became of them after she boarded ship and was placed in irons, God only knows. The records are mute.

No story ever written, no sermon ever preached, no drama ever acted, no scene ever thrown upon a silver sheet can vie in pathos with the silent testimony of this ancient vessel and her original cells and tortures, every one of which you may actually see and feel during your visit.

The Convict Ship teaches more strikingly than a thousand-page volume or hundreds of photographs the story of human progress through three centuries. She was a link between the Orient and the Occident in the days when, as the pride of the vast East India Company's fleet, she carried wealthy and noble passengers from England to India, and returning, brought invaluable cargoes of tea, spices, silks and jewels from Calcutta to London. As a dread felon transport, she carried miserable and often innocent men, women and children from England to Van Dieman's Land and the penal colonies at Botany Bay, Australia, starting the growth of a new continent.

She was an outcast from all traditions, from all the civilized world, from humanity itself, when, moored in Hobson's Bay, Australia, she was a hulk or floating prison used for the torture of those condemned to a living death in a prison which, as can be vividly seen, makes the Bastile, the Kremlin and the Tower of London at their worst seem habitable. She created maritime history when, under her own canvas and unescorted, she sailed first from Australia to England, and then from England to the United States, crossing the broad Atlantic in 96 days. Since her arrival in this country she continues to make history, the number of her visitors, ranging into the millions, far outstripping that of any exhibit ever shown here.

THIS WONDERFUL VESSEL HAS MADE HISTORY THROUGH THREE CENTURIES

She is the oldest ship in the world, and the only convict ship left affoat out of that dreadful fleet of ocean hells which sailed the Seven Seas in 1790 A. D.

She is unchanged after all these years, nothing being omitted but her human freight and their sufferings from the cruelties and barbarities practiced upon them.

She has held lurid horrors and dreadful iniquities beside which even the terrible stories of the Black Hole of Calcutta and the Spanish Inquisition pale into insignificance.

A Child of the American Revolution

The American Revolution, putting an end to the transportation of convicts and white slaves to the Virginia colonies, brought about the settlement of Australia and the creation of the dread fleet (of which the Success was flagship) as carriers of Convicts to Botany Bay.

Aboard her are now shown, in their original state, all the airless dungeons and condemned cells. the whipping posts, the manacles, the branding irons, the punishment balls, the leaden-tipped cat-o'nine tails, the coffin bath and the other fiendish inventions of man's brutality to his fellow man. She

marked the beginning of the end of England's monstrous penal system.

From keel to topmast she cries aloud the greatest lesson the world has ever known in the history of human progress.

Eighth Wonder of the World

Today the old vessel, sole survivor of that awesome fleet spared by the relentless Hand of Time and the fury of the seas, is often called by educators, thinkers and clergymen, the Eighth Wonder of the World, less ancient, but of tremendously more human interest than all the other seven

NOW IS THE TIME

to Open a Combination Checking-Savings Account

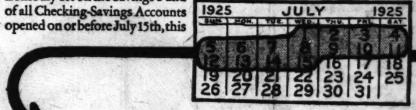

BECAUSE interest on ordinary Savings Accounts is usually computed and credited on July 1st, tomorrow marks the beginning of a new interest

And because the "Republic" allows 3% Interest from July 1st on the Savings Fund

is one of the best seasons of all the year to open your Checking-Savings Account.

Should you already have a straight Savings Account but wish to secure the extra advantages offered by a Checking-Savings Account all you need do is-

bring in your Savings Bank Book and we will be glad to look after all details for you. REMEMBER-

You Lose No Interest If—

you open your Checking-Savings Account on or before July 15th, because we will allow you interest from July 1st. That is why we urge you to open your Checking-Savings Account now.

> Facts About the Combination Checking-Savings Account

And here is a combination bank account. It works automatically, for your deposits are automatically divided on the books of the bank into two funds, one a Checking Fund and one a Savings Fund. Although you open but one account you enjoy the advantages of two. And it is all so simple—nothing Years ago every farmer cut his grain with an old-fashioned scythe. He threshed it with an old wooden flail. Today, however, every farmer harvests his grain with a combination mower and binder. He hauls it to a combination threshing and separat-ing machine. The grain is automatically separated from the straw—one goes into the bin and the other into the straw-stack.

How It Works You have a cec-

tain income so much per month. You know that you are going to

"by check." The one surest way to save money is through a Savings Account. The Checking-Savings Account is designed to accomplish both ends.

When you open your Checking-Savings Account you fix the imum to be maintained in your Checking Fund at approx-imately the total of the checks you expect to draw per month. That amount becomes your current monthly expense budget. You draw checks against this fund, but as you deposit your income the fund is replenished and on the 10th of each month

the bank automatically transfers all funds then on deposit in your Checking Fund, in excess of the maximum you have established, into your Savings Fund where it draws 3% Compound Interest from the 1st of that month.

To sum it all up, your Checking Fund becomes your cur-rent monthly expense budget and your surplus is automat-ically saved for you without the least effort on your part.

For Example

complicated about it.

Jim Brooks is

of a West Side

concern. His

monthly pay

checks

his wife figured out that they should and would save money. They estimated that they could live comfortably on \$200.00 a month. They opened a Checking-Savings Account and fixed the maximum balance in their Checking Fund at \$200.00.

Each and every pay day they deposit their pay check—by mail. The bank credits the amount in their Checking Fund amount in their Checking Fund and promptly forwards them a receipt. They pay all bills by check, but they very carefully limit their expenditures to approximately \$200.00 per month. The result is, there is \$240.00, \$250.00 or \$260.00 on deposit in their Checking Fund on the 10th of each month, depending on just how much they checked

on just how much they checked out during the preceding month. Because they have fixed the maximum in their Checking Fund at \$200.00, the bank automatically transfers this surplus of \$40.00, \$50.00 or \$60.00 into their Savings Fund where it draws 3% from the 1st of that month.

They do not even have to come to the bank. They do not have to bother about maintaining two accounts and be inconvenienced by transferring money from one to the other. They live comfortably, happily and save systematically and automatically.

Running all through the discussion today was the leading note that most of the newer functions of government represent only an adaptation of our government to a more complex folk-life not an intrusion into it. Yet there was little or no demand that government enter new fields. Tet there was little or no demand that government enter new fields. There was genuine worry expressed over the increase of local bonded indebtedness and mounting interest bills. Illinois' policy of issuing thirty year road bonds for roads which will probably not last thirty years was rapped by one species.

There were figures by the ream, most of them adduced to show, in Professor Guild's words that, "since the war, government has been living more cheaply, has spent its money better and gotten more for it than the average individual."

Prof. F. W. Coker of Ohio State university one of the more aggressive col-

"Any worker of the world who happens to be in Russia has the right to vote and the right to be elected to any office, even though he is only passing through the Shepherd case, the state at this time desires the charge of murder against Falman to be stricken from the docket, with leave to reinstate."

Bonds Signed by Policemen.

Faiman had been brought to Judge Lynch's court by the two policemen who signed his bonds when Shepherd's lawyers, William Scott Stewart and W. W. O'Brien, said Faiman should be in the county jail where Shepherd then was. Faiman stood silent as Prosecutor Crowe spoke for his freedom.

dom.

Judge Lynch entered the order which wiped out the indictment charging Faiman with the murder of McClintock. Faiman had been named jointly with Shepherd, his confession that he had knowledge of the intended murder and that he was to share in it to the extent of \$100,000 from the McClintock estate making him an accessory before fact.

Faiman Seems Rewildered

Faiman, although free, stood seemngly bewildered for a moment. When he grasped the situation he didn't wait for an elevator to take him down from the fourth floor, but ran down the stairway. Outside the building he kept

A Real Investment in Health and Sport-for ALL the Family

\$300 Buys a Summer Homesite on a Near-In-Lake

Williams Park is the answer to your dream of a lakeside home. Everything you want—everything Mother wants—everything the youngsters want is here for all. It is yours if you say so. It will be yours if you come and see for yourself. Without question it is the fastest growing summer colony in Illinois.

The reason is plain. Nothing like it has ever been offered. Nothing like it can be offered again. There are no more lakes as near your city home which are not overrun with careless, objectionable crowds.

Because it is only 40 miles from Chicago is only one reason why Williams Park on Slocum Lake at Wauconda, Illinois, is growing so rapidly. Slocum Lake is a natural, clean, spring fed lake with a natural inlet and outlet. It is a beauty spot off the beaten path, yet close enough to be reached in an easy, pleasant ninety minute drive from Chicago on the Rand Road.

There are three thousand feet of park extending along the Come and see the beginning of the sporty golf course (now entire lake property—convenient to all and assuring a per- being constructed by us). manently charming shoreline. Every street runs down to the park and has its own lake approach.

A Community Playground is there for the young ones where they may romp and play to their hearts' content. Mother need never worry about them. They're safe, too, in the water, for the beach slopes so gradually that at two hundred feet from shore the water is less than five feet deep!

Forty-four New Homes Have Been Built in the Past Year

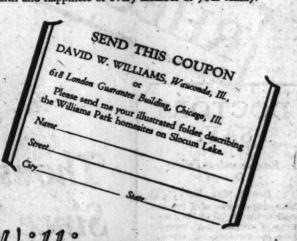

\$100 Down Buys Your Homesite

Already forty-four new summer cottages have been erected and more are going up every week. Soon Williams Park will be entirely built up and the far-sighted home builder and investor will have secured for himself and family not only a place of joy in summer, but an investment which will increase in value every year.

You must come and see for yourself. Come and sample the pure air—the keen fishing, the comfortable atmosphere.

If you haven't an automobile, you can reach Wauconda by fast North Shore Busses. Busses leave the Dempster terminal of the Northwestern Elevated at 9 a. m, 2 p. m.

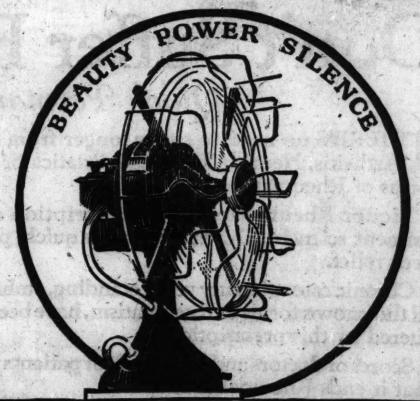

Remember that for as little as \$100 down and the balance on easy terms you can now secure a real investment in the health and happiness of every member of your family.

Hardly Mike's Fault.

Cvengros hurled fairly good ball, and if Faik's attempt at a double play hadn't gone wrong in the eighth, Mike might have, at least, carried the battle into extra innings. Despite his good work, however, he had an uphill fight on his hands from the very start because in the opening inning La Motte doubles, to left, with one dead and

cause in the opening inning La Mette doubles to left with one dead and scored on a single sent skipping into center by Sisier's bat.

Mike and his mates were put further in arrears in the fourth. Rice blasted open the inning with a single and McManus walked. Jacobson also hit safely and Rice scored while McManus went to third. It looked as if tiny Mike was about to make his exit, but a lightning double play started by himself saved his hide. Meanwhile, the Sox had been able to noteh only one hit, that being a single by Sheely in the front half of the fourth.

in the front half of the fourth.

Mogridge Applies the Brakes.

The second hit by the visitors was a single by Collins to start the sixth. He got as far as second base before three men were retired. The next swipe by Davis to pry open the eighth and a moment later knotted the score by socking his homer into right field. The wallop didn't seem to disturb Mogridge in the least, for he flattened the next three batters without a flurry.

Now for the very disastrous eighth. With one out, Lamotte walked. After hitting a long foul that Falk almost caught, Sisier followed through with a double, La Motte going to third.

Rice, hoisted a none too deep fly to Falk and a throw to the plate was a simple matter, but Sisier was so far as econd that Falk elected to make the play there. The idea was good, and would have worked beautifully with a good throw, but Bib perged it so high that the ball rolled to the resort as the mooth concrete in towns and small clies along the paved state reads. this later in the office."

The commuters' express was slowing for Port Chester. Mr. Burke heaved his big bulk out of the chair, and joined a trio of acquaintances who, having anced briefly at their papers, were making ready for their game. The train sopped, and some few members from Port Chester entered the club car. Two of them dropped into the vacant chairs next behind Pol's. They were strangers to him and he to them, having only in the last week taken up his summer residence aboard a little sloop he owned, taking his meals at the yacht club.

Pol composed himself for drowsy repose os, at least, what had the look of the hearry. He pulled down the curtain to avoid the glare and the sight a panorama distasteful to his esthetic sense.

But any chance of catching up a little on sleep lost with sixty-seven dolars the night before was dispelled by the first words of one of the pair behind im, the second man back. He leaned forward and said to his companion in a lateal penetrating voice that, while lowered, plerced the rattle of the train.

"That's Tim Burke, we just passed. Regular old land pirate."

"I know. Pirate is right. Got wind yesterday of a raw deal he's going to true for the pair behind in the first time in a villainous role in the first t

"Yes. It's a damn shame. I don't believe he ever was really balmy. It his course. He's a sort of benigant old chap even if his atheistic ideas a him sacked."

"Well, if Tim Burke has managed to get any sort of agreement out of the ofessor, it is as good as money in the bank. I know his type. The old shioned Bob Ingersoll sort. Denies God in theory and makes most Christians ok like crooks in practice. Too bad."

"Yea. But, after all, it doesn't seem right for any one man to hog a tract is that. Big promontory which sticks out into the sound. If Burke pulls it it will just about kill Cadrigan. I happen to know he's had his eye on it years. We all have for that matter. But Cadrigan's a stayer."

"Michael Cadrigan? Used to be in the lumber business, didn't he?"

"That's the bird—"

A fine ripple seemed to run through Pol. If any observant person, or even in Burke, who was not especially observant, had happened to be looking at the ung man he would have thought him taken suddenly ill. The obvious diagrais of the silent symptoms displayed might have been that of a stomach suddly tormented by a wave of nausea, an aftermath of a synthetic gin or home we sidekick of the poker party, with a pulse wiry and erratic from too many meets.

Letters to Help You

Win Baseball Ticket
BY SALLY JOY BROWN.
Good morning, boys! Are you busy
with your letters telling why you'd
like to be one of my hundred guests
at the White Sox-Washington game a
week from next Friday? You only
have today and tomorrow, you know,
to write them, because I'll pick the
winners Thursday morning.

Just think what a game it will be,
and I know you'll want to be with us
when these two great teams meet.
All you have to do is write me a letter
telling why you'd like to see this
game, and why you don't get much
chance to go. Also be sure to give
your street address and your age.
Then next Thursday I'll pick the
hundred boys whose letters show
they'll enjoy the party most, and I'll
print their names next Sunday.

To help you write a winning letter,
I'm printing two of the good ones I've
received already:
"Dear Sally Joy Brown: Hit it, run,
that's good for a home run, will be the
shouting of the hundred lucky winners at the Sox and Washington
game.

INVITATION To July Investors

The selection of safe investments for July funds is a question which demands the most careful consideration and study. We sincerely believe that every investor may profit by the advice and judgment of a long established and experienced investment house that is in a position to analyze current conditions.

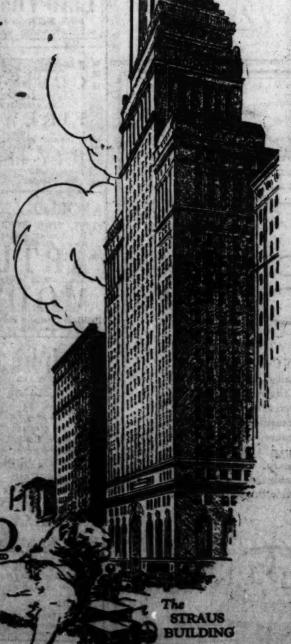

Therefore, the investing public is cordially invited to call at the Straus Building and discuss July investment matters with one of our officers. The Straus Building and the banking quarters of S. W. Straus & Co. will well repay your visit; you will be really welcome, and, of course, you will not put yourself under any obligation whatever.

Investors who call at our banking quarters are also invited to visit the Straus Building Tower Observatory, and can receive free complimentary tickets on application at the bank floor.

If you find it inconvenient to call, we suggest that you write for our special July investment offerings. Ask for

CAPITALIZATION

To be Authorized

To be Outstanding

Upon completion of the proposed recapitalization, the Company will have no funded debt, no bank loans, and (except for approximately \$125,000 preferred stock, which it is expected can be purchased and retired) no class of stock other than that now offered.

Application will be made to list this stock on the New York Stock Exchange

Mr. Milo M. Belding, President of the Company, summarizes his letter of June 26th, 1925, as follows:

BUSINESS AND PROPERTIES: Belding Bros. & Company was incorporated under the laws of Connecticut in 1882 and continues a business established in 1863. The Company is the largest producer of silk thread in the United States, and also manufactures staple broad silks. The products of the Company are sold, through eleven branch offices, to over twenty thousand wholesale and retail distributors, located in every State in the Union. The character of the business is stable, the name "Belding" having become a household word. The eight principal plants of the Company are located at Belding, Mich., Northampton, Mass., Winsted, Conn., and Petaluma, Cal.

MANAGEMENT: The management of the business since its inception has been in the charge of members of the Belding family, who are responsible for its successful development. The principal executives will retain an interest in the stock of the Company and will continue in active manage-

EARNINGS: For the six year period ending December 31, 1924, earnings available for dividends on the basis of the proposed new capitalization, after depreciation and allowing for Federal taxes at present rates, as certified by Messrs. Arthur Young & Co., averaged approximately \$4.47 a share per annum on the proposed issue of 415,032 shares of no par value stock. In no one of the last 25 years have the operations of the Company failed to show a profit, and in all the history of the business there has been only one year of loss.

WORKING CAPITAL: Giving effect to the proposed recapitalization of the Company, total current assets as of December 31, 1924, aggregated \$7,671,695. Current liabilities were \$141,878. The sale of this stock involves no new financing by the Company.

DIVIDENDS: It is the intention of the management to inaugurate dividends on the new stock at the rate of \$3.00 a share annually.

We offer the above shares, subject to necessary action of stockholders in respect to recapitalization, and when, as and if issued and received by us, and subject to approval of legality by Messrs. Root, Clark, Howland & Ballantine for the Bankers, and Messrs.

Choosing Your Investment Connection

CUCCESSFUL investment calls for skill in investigation, facilities for obtaining information and experience and expertness in selection.

Few people have either the experience or facilities. For the great majority, contact with a well organized and permanent institution is desirable.

The Continental and Commercial Banks have permanency. Their officers are trained men who must use conservative methods in the handling of over five hundred million dollars entrusted to them.

To their experience are added facilities for far reaching investigations and a statistical department equipped to apply scientific methods to any analysis.

This experience, conservatism and all these facilities are yours. They have been used in the selection of the bonds we have purchased with our own funds and recommend to you.

We invite you to submit your investment problem to us and we shall be glad to assist you in its solution.

DAVENPORT LOCOMOTIVE WORKS

To Holders of Securities of

Chicago, Milwaukee & St. Paul Railway Company

We have prepared an analysis of your railroad, which we will be glad to furnish upon request.

We believe the evidence is overwhelming that the decline in financial strength of the Northwestern roads and the receivership of the St. Paul road has been caused, not by lack of traffic, inefficient operation or overcapitalization, but by confiscatory freight rates.

To meet the present day costs of operation, the increase in rates since 1909 allowed the St. Paul and its two principal neighbors—the Northern Pacific and Great Northern, has been 28% as compared with 46% for the United States as a whole. That the freight rate basis in the entire Northwest is too low is evidenced by the fact that the Northwestern Region, as designated by the Interstate Commerce Commission and comprising eighteen Class I railways, carned as a whole a return upon their property investment of only 2.83% in 1922; 3.45% in 1923; and 3.12% in 1924.

We consider that your company is in receivership because the government has failed in its obligation to afford an adequate income through a proper rate structure. The proposal to deprive the holders of \$231,000,000 bonds of the right to fixed interest, and the assessment of the stockholders in the sum of \$70,000,000, measure the degree of confiscation of your property.

On behalf of ourselves and of the owners of large amounts of sec of every class, we refuse to acquiesce in what appears to be the destruction of your property through confiscatory rates. We have engaged counsel and This matter however should not be confined to an investment house but should be the work of a committee representing all those owning St. Paul securities. We contemplate the organization of such a committee, based upon the responses to this notice. We welcome suggestions. We do not ask you to deposit bonds or stock. We do ask your aggressive support in this effort to protect your property from confiscation

We do not comment in detail upon the proposed reorganization plan, as deplore any division of opinion among the security holders. However, recommend that you do not deposit your securities under this plan because we believe that such action amounts to acquiescence in confiscatory rates and in the unfair and severe requirement of the immediate liquidation of the government loan. Such acquiescence will seriously handicap any efforts to secure higher rates and a fair adjustment of the government loan.

The success of this effort to protect your property depends on the active support of the security holders. We already speak for over \$60,000,000 par value. We invite the support of every owner of the St. Paul securities.

Please write us, giving your name and address and the securities held by you so that we will be aided in our task of organization.

Copyright: 1925: By The Chicago Tribune Twin State Gas and Electric.

J. R. E., Farmer City, Ill.-The Twin State Gas and Electric company was in-corporated under Connecticut laws in 1906. It owns and operates a group of public utility properties supplying fiftyseven communities with electric light and power, three communities with gas service and one community with motor bus transportation. The territory served includes communities in New Hampshire, Vermont, Maine, and New York. The combined population of the territory served is estimated at 150,000. The company is issuing \$1,000,000 first lien and refunding mortgage 5½ per cent bonds, sereis A, due 1945. These bonds are secured by a direct lien on all properties, rights and franchises, subject to underlying bonds and sharing the lien with the first and refunding mortgage 5s of 1953. They are further secured by pledge of \$1,900,000 of the first and refunding mortgage 5s of 1953. In addition to those pledged there are outstanding \$2,005,000 of the latter bonds, \$276,500 underlying divisional closed mortgage bonds and \$181,000 bonds of a subsidiary. Net earnings [including this subsidiary, after maintenance, taxes and depreciation, for 1924 were \$598,838, or over 2.60 times the annual interest charges of \$227,342 on the company's total funded debt, inon the company's total runder described to the cluding the present issue. Approximately 92% per cent of the company's net earnings are derived from the sale of electric light and power. These bonds are a sound investment.

GUARANTY TRUST COMPANY OF NEW YORK, TRUSTEE

Mr. Fred T. Ley, Treasurer of Fred T. Ley & Co., Inc., summarized his letter to us as follows:

DESCRIPTION: These notes will be the direct obligation of Fred T. Ley & Co., Inc., General Contractors, and will be secured by deposit with the Trustee of real estate bonds aggregating \$1,020,000 in principal amount, secured by second mortgages on improved real estate in New York City and vicinity.

The interest receivable from the bonds to be pledged as collateral will be more than sufficient each year to pay the interest charges on these notes. The maturities of the bonds to be pledged as collateral will be sufficient in each year to pay the serial maturities on these notes.

ASSETS: Based on audit as of February 28, 1925 giving effect to transactions in connection with present financing, net tangible assets, after deducting all liabilities except this issue, were \$4,096,388—equivalent to \$5,120 for each \$1,000 note.

EARNINGS: The earnings of the Company available for interest, depreciation and Federal Income Taxes as certified have been as follows:

7.8 times For 9 years and 10 months ended Feb. 28, 1925 \$378,319 7.8 times 8.0 times

Maximum annual interest requirements on this issue \$48,000 In none of these years did the Company earn, on the basis reported above, less than 5 times the maximum annual interest requirements on this issue.

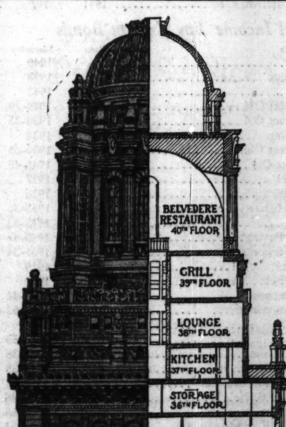

PURPOSE OF ISSUE: The proceeds from this issue of notes will be used to refund bank loans and other indebtedness of the Company, and for other corporate

Dominating Chicago

The Jewelers Building of Chicago, rising 523 feet above the upper level of Wacker Drive (new South Water Street improvement) will be the tallest office building west of New York City. Highest standards of office building design and construction are incorporated. Excellent transportation facilities to all parts of the city, unexcelled light and air resulting from frontage on all four streets, and boulevard location overlooking the river, give this building outstanding advantages.

The Jewelers Building

will be occupied for forty stories-four floors of shops and nineteen floors of offices in the main structure, twelve floors of offices in the tower up to

The New York Trust Company, New York

Mr. A. E. Fitkin, President of the Corporation, summarizes his letter as follows:

HISTORY AND BUSINESS: National Public Service Corporation, through local operating companies, furnishes electric light and power, gas, steam and/or water service to communities in states along the Atlantic Seaboard, namely New Jersey, Pennsylvania, North Carolina, and Florida, and upon completion of this financing, will also serve sections in Virginia, West Virginia, Georgia and Ohio. The territory in New Jersey includes a portion of the great metropolitan district tributary and suburban to New York City. Through these operating companies a total of 161,072 customers will be served, of which 131,622 will be electrical, 28,901 gas, 1,425 water and 441 steam. The Corporation also operates electric railway systems serving an aggregate population of about 660,000.

From a letter of Mr. Carl M. Einhart, President of the Company, the following information is summarized: Earnings Statement of earnings for the twelve months ended April 30, 1925:

The Company Southwestern Public Service Company owns and operates three groups of public utility properties serving a rapidly growing territory in New Mexico, Arizona and Texas. The principal communities served are Amarillo, Texas; Roswell, Carlsbad, Artesia, Hagerman, Dexter and Lake Arthur, New Mexico; and Flagstaff, Holbrook and Winslow in Arizona. The Company or its predecessors, for years has been a contributing factor of great importance in the growth and development of the sections it serves. It supplies one or more vital public necessities, electric power and light, gas, water and ice, to approximately 50,000 people in ten municipalities and extensive rural communities in the states named.

Security The First Mortgage Bonds, constitu-ting the only funded debt of the Company, of which there will presently be \$3,500,000 outstanding, will be secured, in the opinion of counsel, by a direct first mortgage on all the physical properties of the Company, the valuation of which, as determined by competent public utility engineers and appraisers, is largely in excess of the first mort-
